A NEW PLAN OF INDEXING  
THE CURRENT LIST OF MEDICAL LITERATURE

The index to each of the first four volumes of the Current List was made by transferring the titles to cards and alphabetizing the latter in accordance with the indexing word of each title. Under this plan, it was necessary to await the appearance of the last issue of the volume before the final classification of the titles could be completed and the preparation of the text of the index begun. Furthermore, the indexing could not be subdivided and the parts assigned to several persons. It came about, therefore, that half a year's time was required after the final issue of each volume appeared, before its index was ready for publication.

An examination of the several indexes made so far shows that the principal headings and their subdivisions are repeated with a fair degree of regularity in each. It was for this reason that we considered they might be used as a framework upon which to construct the indexes to future volumes of the Current List. With such a "skeleton," it becomes necessary only to find the general heading and specific subdivision under which each title properly belongs and to write in additional modifying phrases as needed, together with the column number and lettered position, showing where the indexed title is located. In this manner, the final indexing of each title can be done as the issues of the Current List appear. Shortly after the last issue of a given volume is published, the text of the index can be prepared for typing and printing. This plan permits all cross-indexing to be done at the time the title is indexed under its principal heading.

The greatest advantage appears to be that this method permits the subdivision of the work among persons possessing special qualifications in the several fields of medical research. Thus, a skeleton index for a particular division - for example, dentistry - is prepared for a collaborator qualified in this field. He searches not only the division 11 (Dentistry, Stomatology) of the Current List, but all others in which papers dealing with

(continued on inside back cover)

---

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at \$1.00 per year. Address communications to: MedicoFilm Service  
Army Medical Library  
Washington, D.C.

#### 4. Aviation Medicine

Air Surgeon's Bull., 1944, 1: (Jan.)

- GRANT, D.N.W. The Army Air Forces Medical Services; a 2 year review. 1-4.  
 HASS, G.M. Internal injuries of personnel involved in aircraft accidents. 5-10.  
 CARLSON, L.O. A concise description of the demand oxygen system. 14-17.  
 MOGS, B.M. General care and treatment of burns. 19-21.  
 BRASLOW, L. A sterilization apparatus for field use. 22.  
 KARPOVICH, P.V. Physical training for flyers. 24.

J. Aviat. M., 1943, 14: (Dec.)

- LAMPONT, H. BROOKES, R.D., ET AL. A pursuit-meter with an application in aviation medicine; the effect of low atmospheric pressure. 336-45.  
 PALITZ, L., FRIST, T., & KOCOUR, E. The effects of pressure on the carotid sinus at various altitudes. 346-55.  
 GRAYBILL, A., LILIENTHAL, J.L., JR., & HORWITZ, O. Flicker fusion tests as a measure of fatigue in aviators. 356-9.  
 WARD, R.L., & OLSEN, O.C. Report of a case of severe anoxic anoxia with recovery. 360-5.  
 GREEN, D.M. Airlsickness in bomber crews. 366-72.  
 GREEN, D.M. Aeroneuroses in a bomb training unit. 373-7.  
 STUBENBORD, J.G., III. Medical problems of the Civil Air Patrol Office of Civilian Defense. 378-82.  
 KAUFMAN, D. Notes on classification, selection and training. 383-5.

#### 5. Bacteriology; Parasitology

J. Bact., Balt., 1943, 46: (Dec.)

- SELEEN, W.A., & STARK, C.N. Some characteristics of green-fluorescent pigment-producing bacteria. 491-500.  
 WICKERMAN, L.J. A simple technique for the detection of melibiose-fermenting yeasts. 501-5.  
 MC CLUNG, L.S. On the enrichment and purification of chromogenic spore-forming anaerobic bacteria. 507-12.  
 EVANS, F.R., & CURRAN, H.R. The accelerating effect of sublethal heat on spore germination in mesophilic aerobic bacteria. 513-23.  
 ANTOINE, L.D., & HARGETT, M.V. Machine for shell freezing small volumes of biological preparations. 525-9.  
 HALLAENDER, A. Effect of long ultraviolet and short visible radiation (3500 to 4900 Å) on *Escherichia coli*. 531-41.  
 NUKBAUM, L., & FIGGOLI, N.P. Penicillin; its use in media for the isolation of *H. influenzae* from laryngeal cultures in obstructive laryngitis. 543-7.  
 WELLS, W.F. Bacteriologic procedures in sanitary air analysis, with special reference to air disinfection. 549-57.  
 FERNEY, R.E., MUELLER, J.H., & MILLER, P.A. Growth requirements of *Clostridium tetani*; factors exhausted by growth of the organism. 559-62.  
 FERNEY, R.E., MUELLER, J.H., MILLER, P.A. Growth requirements of *Clostridium tetani*; a synthetic medium. 563-71.

CAMPBELL, J.J.R., BELLAMY, W.D., & GUNSALES, I.C. Organic acids as substrates for streptococci. 573.

BELLAMY, W.D., & GUNSALES, I.C. Growth requirements of *Streptococcus fecalis* for tyrosine decarboxylation. 573.

NIVEN, C.F., JR. The nutrition of group B streptococci. 573.

BROOKS, R.F. Taxonomy of certain members of the genus *Corynebacterium* from animal sources. 574.

DELBHUTK, M., & LURIA, S.E. A comparison of the action of sulfa-drugs on the growth of a bacterial virus and of its host. 574.

LURIA, S.E. Dissociation of the growth of bacterial viruses and of their host by means of temperature above optimum. 575.

SAUNDERMAN, A., & MC CLUNG, L.S. Effect of various concentrations of iron on the production of riboflavin by certain clostridia. 575.

SCHNETZLER, E.E. Natural bactericidins in the plasma of the domestic fowl. 575.

MC CLUNG, L.S. A technique for the production of antisera for *Paramecium aurelia*. 576.

MC CLUNG, L.S. Notes concerning the history of bacteriology at Indiana University. 576.

REYNIERS, J.A., & ERVIN, R.F. The history of bacteriology at the University of Notre Dame. 577.

Zbl. Bakt., 1. Abt., 1943, 150: (Sept.)

TRAUB, E., & MÖLLMANN, H. Typbestimmung bei Maul- und Klauenseuche mit Hilfe der Komplementbindungsprobe. 289-310.

RUSKA, H., & KAUSCH, G.A. Ueber Form, Grössenverteilung und Struktur einiger Virus-Elementarkörper. 311-18.

TIEFF, C.J., GOETTS, W., & HALDENWANGER, H. Untersuchungen über die Wirkung der Eubasitherapie auf die Darmbakterienflora und die Phagenentwicklung. 319-25.

BEKKER, J.H. Die Hämudigestion des Milzbrandbazillus. 326.

MATOFF, K. Altersimmunität und parenteral erzeugte Muskeltrichinellose beim Rinde. 325-36.

BARTEL, H. Verfahren zur Rückgewinnung des Agar-Agar aus gebrauchten Nährböden. 336-44.

GALLE, E. Kriegswirtschaftlich bedingte Änderungen in der Herstellung unserer Bakteriennährböden. 345-9.

SEELMANN, M., & MEYER, A. Zur Frage des Ersatzes von Nähragar durch Infusextrakt-agar und zur Eignung des sogenannten rückgewonnenen Agars zur Bakterienzüchtung. 349-52.

#### 6. Biology; Embryology

Biologico, S. Paulo, 1943, 9: (Sept.)

KRAMER, M., & ANDRADE, A.C. DE. Estudos sobre adesivos da calda bordaleza. 317-30.

FERRAZ DE OLIVEIRA, J. Peste suína. 331-5.  
 Rev. brasil. biol., 1943, 3: (Sept.)

PEREIRA BARRETO, M., & COUTINHO, J.O. Criação de algumas espécies de anofelinos brasileiros. 317-23.

BIEN, O. A simplified formula for the production of diphtheric toxin of high potency (50Lf) 325-9.

BIEN, O., & THAPP, E. Sobre a ordem de fixação dos diferentes componentes do complemento ao complexo antígeno-anticorpo. 331-6.

MEYER, H., & XAVIER DE OLIVEIRA, M. Conservação de protozoários em culturas de tecido mantidas a temperatura ambiente. 341-3.

TRAVASSOS, L. Tricostongilídeos de mamíferos. 345-9.

OZORIO DE ALMEIDA, M., MOUSSATCHIE, H., & VIANA DIAS, M. Recherches sur l'attaque epileptiforme produite par le refroidissement brusque de la moelle épinière (cryoepilepsie); l'attaque epileptiforme chez les lacertiliens, les crapauds, les rainettes. 355-60.

MELLO, M.I. Nota sobre a determinação do ácido láctico em alguns animais de laboratório. 365.

## 8. Cancerology

Bull. Am. Soc. Cancer, 1943, 25: (Nov.)

PITTS, H.C. Educational program of American Society for Control of Cancer. 122-6.

MACFARLANE, C. They all volunteered; 5 years of semi-annual health examinations. 127.

## 9. Cardiovascular System

Am. Heart J., 1943, 26: (Dec.)

LUISADA, A.A. On the pathogenesis of the signs of Traube and Duroziez in aortic insufficiency; a graphic study. 721-36.

ERICH, W.E., & KRUMHAAER, E.B. A frequent obstructive anomaly of the mouth of the left common iliac vein. 737-50.

KEHL, K.C., & RICHIE, G. Disseminated arterial intimal proliferation with thrombosis; report of a case. 751-62.

VISCIOI, P.C., & GEIGER, A.J. Electrocardiographic observations on 500 unselected young adults at work. 763-8.

BAYLEY, R.H. On certain applications of modern electrocardiographic theory to the interpretation of electrocardiograms which indicate myocardial disease. 769-831.

ZASLOW, J., & KRASNOFF, S.O. Coarctation of the thoracic aorta with an aneurysm distal to the obstruction; report of a case. 832-5.

EISAMAN, J.L. Chronic occlusive arterial disease (arteriosclerosis obliterans), associated with retinitis pigmentosa, case report. 836-8.

## 10. Chemistry, Physics

Arch. Biochem., N.Y., 1943-44, 3: (Oct.)

JOHNSON, F.H., EYRING, H., & KEARNS, W. A quantitative theory of synergism and antagonism among diverse inhibitors, with special reference to sulfinilamide and urethane. 1-31.

NEUBERG, C. LUSTIG, H., & ROTHENBERG, M.A. Fructose-1, 6-diphosphoric acid and fructose-6-monophosphoric acid. 33-44.

ELMAN, R., DAVEY, H.W., & LOO, Y. The influence of histidine on the urinary excretion of nitrogen in dogs given pure amino acid mixtures intravenously. 45-52.

HESS, W.C., & SULLIVAN, M.X. The rate of liberation of cystine from proteins by acid hydrolysis. 53-60.

MARTIN, G.J. Study of various chemicals depressing the thyroid gland. 61-9.

BONNER, D., TATUM, R.L., & BEADLE, G.W. The genetic control of biochemical reactions in Neurospora; a mutant strain requiring isoleucine and valine. 71-91.

SCHLENK, F. Nicotinamide riboside. 93-103.

NEUBERG, C. Synthesis of d(-)-3-phosphoglyceric acid and d(+) 2-phosphoglyceric acid. 105-12.

SCHWEIGERT, R.S., MEINTIRE, J.M., & ELVEHJEM, C.A. Effect of the composition of the diet on the vitamin content of rat tissues. 113-20.

BURKHOLDER, P.R. Influence of some environmental factors upon the production of riboflavin by a yeast. 121-9.

Arch. Biochem., N. Y., 1943-44, 3: (Dec.)

NEISH, A.C., & HIBBERT, H. Studies on plant tumors; carbohydrate metabolism of normal and tumor tissues of beet root. 141-57.

NEISH, A.C., & HIBBERT, H. Studies on plant tumors; nitrogen-metabolism of normal and tumor tissues of the beet root. 159-66.

LEVI, I., MICHAELIS, M., & HIBBERT, H. Studies on plant tumors; oxalases in normal and tumor beet root tissue. 167-74.

BEARD, H.H. The formation of creatine from ammonium carbonate and sarcosine in vitro. 175-90.

BEARD, H.H. The influence of the rate of protein metabolism upon creatine-creatinine transformation and excretion in the rat. 181-7.

OTT, A.C., & BALL, C.D. Some components of the seed coats of the common bean, Phaseolus vulgaris, and their relation to water retention. 193-92.

JONES, C.H., & MEGHAN, D.K. The dispersion of keratins; studies on the dispersion of keratins by reduction in neutral solutions of protein denaturants. 193-202.

KACHEN, M., GADRAITH, H., ET AL. The distribution of lipids in animal tissues. 203-15.

BLOCK, R.J., & BULLING, D. The amino acid yield from various animal and plant proteins after hydrolysis of the fat free tissue. 217-26.

LASKOWSKI, M., & RYERSON, D.L. The effect of different sodium chloride concentrations on nuclei from chicken erythrocytes. 227-33.

CHANG, Y.T., CHEN, J.M., & SHEN, T. Induced polycythemia in salamander by cobalt, ascorbic acid, and other water soluble vitamins. 235-9.

FOSTER, J.W., & WOODRUFF, H.B. Microbiological aspects of streptothricin; antibiotic activity of streptothricin. 241-55.

BOHONES, N., & SUBBAROW, Y. The requirement of biotin for the growth of pneumococci. 257-9.

SCIARINI, L.J., & NORD, F.F. On the mechanism of enzyme action; elementary sulfur as hydrogen acceptor in dehydrogenations by living fusaria. 261-7.

J. Am. Chem. Soc., 1944, 66: (Jan.)

ADAMS, R., CLARK, J.H., ET AL. Substituted aminobenzo-furoquinolines. 22-6.

CREIGHTON, R.H.J., GIBBS, R.D., & HIBBERT, H. Studies on lignin and related compounds; alkaline nitrobenzene oxidation of plant materials and application to taxonomic classification. 32-7.

HOFMANN, K. The synthesis of 3,4-dicarboxy-2-furanvaleric acid and some of its derivatives. 51-3.

HANN, R.M., NESS, A.T., & HUDSON, C.S. Diacetone xylitol (2,3,4,5,di-isopropylidene-D,L-xylitol). 73-6.

JAMES, T.H. Ascorbic and iso-ascorbic acids as photographic developing agents. 91-4.

COHAN, L.H. Hysteresis and the capillary theory of adsorption of vapors. 98-105.

- BALDWIN, R.R., BEAR, R.S., & RUNDLE, R.E. The relation of starch-iodine absorption spectra to the structure of starch and starch components. 111-15.
- COLBERT, J.C., HOUGHTON, H.W., ET AL. The iodination of 4-hydroxybiphenyl. 122-4.
- ZECMEISTER, L., & POLGAR, A. Cis-trans isomerization and cis-peak effect in the carotene set and in some other stereo-isomeric sets. 137-44.

this subject are likely to be found. The pertinent titles he finds are indexed by inserting the necessary notations in the skeleton of principal headings and their modifications, typed on sheets contained in a loose-leaf binder. Sufficient space is left between the entries in the skeleton to permit writing in new ones as required. In cases where it is necessary, supplementary sheets may be inserted in the binder to take care of an unexpectedly large number of entries under a given heading.

This plan permits gathering together in the index, closely related medical subjects under general headings corresponding to the principal subdivisions of medicine. Persons whose interests lie in a particular field of medicine will find collected in one place, the pertinent references to all phases of that particular subject. It is hoped that this new plan will contribute to making the Current List an exceptionally convenient key to the literature of the various subdivision of medicine.
